Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 1-29-02 and 3-18-02
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

Art Unit: 1754

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 5,7,12 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In claim 5, the preamble and each occurrence of "controlling" are new matter.

In claim 7, "wherein ... 5 to 50 hours" is new matter.

In claim 12, "wherein ... to form a final material" is new matter.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 5, "controlling the crystallite size ... or greater" and "controlling the lattice distortion ... or less" is indefinite and fails to particularly point out and distinctly claim what the positive process steps of the method are. It is indefinite as to what is meant by "controlling" or what is considered to be "controlling".

Art Unit: 1754

In claim 7, "at least one of (i) salts ... and oxides of manganese" is indefinite as to what the "at least one of" refers to since the word "and" is used in the recitation a total of three times and therefore would appear to require all of the members and not just "at least one of".

In claim 10, "pulverization step" is indefinite as to what is being pulverized during the "pulverization step".

In claim 14, "the pulverized mixture" lack(s) proper antecedent basis in the claim(s).

In claim 15, "at least one of (i) salts ... and oxides of manganese" is indefinite as to what the "at least one of" refers to since the word "and" is used in the recitation a total of three times and therefore would appear to require all of the members and not just "at least one of".

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mayer '947 or Ogihara '410 or Manev '943.

Each of the references teaches the instantly claimed steps for "controlling" recited in claims 7 and 12 which would therefore control the crystallite size and lattice distortion because

that is what is instantly claimed. See example 5 of Mayer; cols. 5,6 of Ogihara; cols. 5,6 of Manev.

The subject matter as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to select the portion of the prior art's range which is within the range of applicant's claims because it has been held to be obvious to select a value in a known range by optimization for the best results, see *In re Boesch*, 205 USPQ 215.

The subject matter as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to have selected the overlapping portion of the range disclosed by the reference because overlapping ranges have been held to be a prima facie case of obviousness, *In re Malagari*, 182 USPQ 549.
